

**Rendham Village Hall Chairman's Report to the Parish Council January 2025**

The management committee remains committed to ensuring that Rendham Village Hall is maintained and operates in accordance with all legal obligations and continues to be financially viable. A range of activities continue to take place in the hall, some as regular bookings and others on occasional use.

The lighting units in the toilet areas are going to be upgraded in the coming weeks to LED. Such units will be long lasting and will dispense with the need to replace the bulbs which have become more difficult to source locally and some of which are difficult to access.

The most pressing concern to deal with in 2025 is the crack in the wall of the building adjacent to the road on entering the hall and into the female toilet area. Arrangements had been made for remedial action to be undertaken last October/November. Further inspection at the time of commencement of the work disclosed possible subsidence. At this time, I am seeking advice from our building insurers to determine the correct course of action before proceeding.

The management committee will hold its first meeting of 2025 on 27<sup>th</sup> January.

Denis Moore

Chairman Rendham Village Hall Management Committee

January 2025
