

## Rendham Village Hall Chairman's Report to the Parish Council July 2025

The previously reported subsidence claim remains ongoing through the insurance process.

The previously mentioned roof leak has been repaired. In consultation with the roofing contractor I have requested a quote for some extra attention to ridge tiles and valley gutters in anticipation of future issues that may arise. This will be presented to RVHMC when received.

The sound system amplifier mounted in the loft space became defective and has been replaced.

Denis Moore

Chairman Rendham Village Hall Management Committee
